

Puppy ID Bands are colorful litter collars for newborn puppies and kittens or other small animals. The litter collars provide an easy way for breeders to keep up with who's who in the litter. Each package contains 12 collars (bands) so each pup wears a different color. Our wrap-around style puppy litter bands are lightweight and thin made with a softer (safer) velcro material that self attaches. When used correctly, they are safe for young puppies and other small animals.

- give each puppy identity using a different colored collar on each puppy
- self attaching lightweight collars
- no buckles or strings
- easy wrap-around soft velcro
- adjustable
- 3 sizes to choose from
 - 8 inch - \$10.00
 - 12 inch - \$13.00
 - 14 inch - \$15.00

The 8 inch size is recommended for all breeds (newborns) to start with. The 8 inch size can be used for several days before moving up to a larger size if needed.

IMPORTANT: Be sure to wrap the puppy band evenly so that it attaches to itself completely. There should be a minimum 1 inch overlap for it to have a secure grip. Wrap the band loose enough that a finger can slide under it but not so loose that it can get hung on another object. Check daily for growth adjustments. Please view the video on the home page which shows how to wrap the puppy band around the neck of a young puppy. These are temporary collars and not intended for long term use. Because they are made of a softer (safer) material, fading may occur sooner than other stiffer velcro collars.

For breeders who like to keep detailed records on all their puppies, we offer Puppy Charts that match the colors of our Puppy ID Bands. This is a great record keeping system that allows breeders to keep track of whelping details, feeding times, daily & weekly weight progress, vaccinations, wormings, microchip numbers and new puppy owner information. The record keeping task is greatly simplified when the Puppy ID Bands are used together with the charts.
